Settings & help

Hey Gemini, can you help me make a an equalizer, make equalizer settings, parametric equalizer settings for the steelseries Gigi application?

Okay, making custom equalizer settings can really change the way your music sounds. To start, let's figure out what kind of sound you're going for. Do you want more bass, more high notes, or maybe something more balanced?

I want to enhance the spatial audio even with music.

Okay, for a wider soundstage, we'll focus on the mid-range frequencies. Can you find the slider labeled "Presence" or something similar?
